

ANTI-DOPING POLAND ANNUAL REPORT

2014

Komisja do Zwalczenia Dopingu w Sporcie

MESSAGE FROM COMMISSION PRESIDENT AND OFFICE DIRECTOR

In 2014 we prepared implementation of the amended World Anti-Doping Code. Following recommendations of the World Anti-Doping Agency, the Commission Against Doping in Sport prepared Polish Anti-Doping Rules, a Polish counterpart of the Code, and started cooperation with Polish sport unions and associations in order to incorporate new regulations. We also prepared assumptions for the establishment of a disciplinary panel of the Commission Against Doping in Sport which will hear cases of anti-doping rule violations on behalf of and/or at the request of international federations.

Thirty four anti-doping rule violations were detected in 2014, 16 less than in 2013. Although the number of violations was smaller, their “weight” was much greater than in the previous years since the prohibited substances detected in athletes belong to what is called “hard doping”. Furthermore, the violations were committed by athletes with excellent sport performance. It must be emphasized that the Commission detected the world’s only case of using a human growth hormone. It follows from the statistics that in 2014 athletes more infrequently used stimulants, which are present in food and dietary supplements.

Our awareness raising and educational campaigns deserve special mention. In 2014 we continued the “SAY NO! TO DOPING” campaign with Polish top athletes acting as the campaign’s ambassadors. The campaign was enriched with an e-learning module targeted at young athletes and their coaches, called “True Master Academy”.

All this is necessary to provide data to the World Anti-Doping Agency and

The basic aim for the coming year is full implementation of the biological passport programme, which will be possible when we have received permission from the Inspector General for Personal Data

international federations.

COMMISSION'S WORK IN NUMBERS

(3100) doping tests 1518 tests in competition
1582 tests out of competition

100 athletes in registered testing pool

406 control actions

(OVER 2000) athletes, who took part in educational campaigns
confirmed anti-doping rule violations

34 unique visits to the website

(56,000) athletes covered by educational activities

(6.500) Commission's budget without funds allocated for laboratory analyses

(PLN 2,500 000) - the world's only detected use of growth hormone

(1)

EDUCATION AND INFORMATION

In 2014 we continued the “SAY NO! TO DOPING” campaign started in 2012. It was delivered on the same principles as in previous years. Last year we added an innovative educational mailing program for athletes and coaches called TRUE MASTER ACADEMY. The opening conference of the Academy was held on 26 May 2014 on the premises of the Polish Olympic Committee in Warsaw. The conference, at which the main assumptions and aims of the Academy were presented, was attended by representatives of the

Ministry of Sport and Tourism, Polish Olympic Committee, Polish sport unions and associations, other important sport organizations and journalists.

The athletes who decided to support the campaign and became its official ambassadors included (from left) Tomasz Kucharski, Marcin Lijewski, Robert Korzeniowski, Tomasz Majewski., Luiza Zlotkowska, Paweł Korzeniowski, Katarzyna Skowrońska - Dolata, Paweł Zygmunt and Katarzyna Rogowiec

The model of anti-doping education presented at the conference uses widely available on-line tools to reach out to the entire sport community. The program is targeted mainly at young athletes and their coaches, but it is open to any person interested in the fight against doping. **It is enough to register at <http://saynotodoping.anty doping.pl/>** and wait for the learning packages sent by us once a week by email.

EDUCATION AND INFORMATION

Information and educational materials and various gadgets were prepared. In this way we could reach out to young athletes, their coaches and parents.

However, our visits to sport events, particularly during the Polish Youth Olympic Days, proved to be most effective. They are always a great opportunity to meet athletes representing different sports from all over Poland, particularly athletes from outside national teams of Polish sport unions and associations.

According to our estimates about 6,500 athletes could have learned about the basics of doping control at the meetings organized by us. Meetings and workshops organized at the initiative of Polish sport unions and associations, sport championship schools, sport clubs or other organizations are another, but equally effective form of talking about how important clean sport is and why doping should be avoided. All the educational campaigns and actions are conducted by the Commission within the national educational program recommended by the World Anti-Doping Agency. According to WADA educational activities are becoming very important in the fight against doping, both nationally and internationally, and therefore WADA recommends expanding educational programs and allocating more funds for this purpose, even if it proved necessary to reduce the number of doping tests.

Although in line with WADA recommendations our educational campaigns are targeted mainly at young athletes, in many cases they also reach out to the entire sport community, including coaches, parents, teachers, instructors and medical personnel.

EDUCATION AND INFORMATION

Our educational campaigns

Visits to sport championship schools (SMS) and sport schools:

1. SMS in Szczyrk (Alpine skiing, ski jumps, cross-country skiing) during the “Championship Days at School” campaign,
2. SMS in Zakopane (Alpine skiing, ski jumps, cross-country skiing, speed skating) during the “Championship Days at School” campaign,
3. SMS in Gryfice (volleyball) – a visit organized by the Education Office, County Governor Authorities,
4. Secondary School in Łomża (athletic sport classes, wrestling, football),
5. Secondary Schools in Rudna.

EDUCATION AND INFORMATION

Visits to sport arenas during Polish Youth Olympic Days and other sport events:

1. OOM Oborniki Śląskie (weight lifting),
2. OOM Wrocław (athletics),
3. OOM Zielona Góra (swimming),
4. OOM Kruszwica (rowing),
5. OOM Bydgoszcz (canoeing),
6. Polish Junior Athletic Championships (Toruń),
7. Polish Junior Archery Championships (Kielce),
8. U-23 Beach Volleyball World Championships (Mysłowice), FIVB sponsored “outreach” campaign
9. Men’s Volleyball World Championships (Katowice), FIVB sponsored “outreach” campaign

EDUCATION AND INFORMATION

Other educational activities:

1. Anti-doping training for students of the University School of Physical Education in Poznań (at the Institute of Sport in Warsaw),
2. Anti-Doping Information Desk at the Olympic Picnic organized by the Polish Olympic Committee,
3. Training for students of the University of Medical Sciences in Poznań – Institute of Sport,
4. Training for students of Maria Skłodowska-Curie University - Lublin,
5. Coach Conference - Spała,
6. Lectures for SWPS University,

7. Lecture for Institute of Sport physicians.

The “SAY NO! TO DOPING” campaign attracted active involvement of some Polish sport federations:

- *Polish Ski Federation,*
- *Polish Basketball Federation,*
- *Polish Volleyball Federation – Professional Volleyball League,*
- *Polish Handball Federation,*
- *Polish Cycling Federation.*

The sport federations promoted the campaign idea at their most important sport events (Polish championships, Polish cup). The slogans and logos of the campaign presented in the form of traditional and electronic banners reached out to the public during TV coverage of games and matches at which the campaign was promoted.

POLISH SWIMMING ASSOCIATION AND COMMISSION AGAINST DOPING IN SPORT JOIN FORCES TO FIGHT DOPING

The Commission Against Doping in Sport and the Polish Swimming Association joined forces and organized the second edition of the anti-doping campaign targeted at students of sport championship schools and training centres.

The first edition of the campaign contributed to the reduction of positive doping test results and detection of prohibited substances among swimmers. From the start of the campaign to the end of this year's edition no positive doping test result was recorded among swimmers.

These actions will be continued in the following years. The anti-doping training program comprised organization of meetings

in 15 selected sport championship schools and swimming centres all over Poland in October 2014. Meetings were held in Warszawa, Zielona Góra, Wrocław, Racibórz, Katowice, Oświęcim, Kraków, Olsztyn, Białystok, Gorzów Wlkp., Łódź, Szczecin, Bydgoszcz, Poznań and Lublin. We wish to thank the Polish Swimming Association for the help in the organization of all the meetings and invite other associations and federations to join us in the organization of similar educational project.

A similar educational camping was conducted jointly with the Polish Rugby Union. Training was offered to young athletes and coaches. We visited training centres in Łódź, Lublin and Sopot. Next year we plan to train athletes in all clubs participating in league games.

EDUCATION AND INFORMATION

Our Newsletter, available online since the beginning of 2013, plays an important role in our educational and information campaigns. It is published every two months and carries a collection of the most important information and problems connected with the fight against doping. It is

targeted at the entire sport community in Poland. The Newsletter carries information about the work of world and national anti-doping organizations, press coverage of doping in sport and theoretical and practical aspects of doping control procedure.

BRIAN COOKSON – „ZGADZAM SIĘ NA KARY WIĘZIENIA ZA OSZUSTWA DOPINGOWE”

Po tym jak prezydent Światowej Agencji Antydopingowej (WADA) Sir Craig Reedie wypowiedział się w stosowny sposób, że kierowana przez niego organizacja nie popiera kary więzienia za łamanie przepisów antydopingowych, natychmiast pojawiły się odwołania opublikowane przez, płynące z różnych środowisk sportowych.

Przedtem zdania nie miałyby bowiem prezydent Światowej Agencji Antydopingowej (WADA) Brian Cookson, który popiera projekt prawa karnego, dopuszczającego kary więzienia za łamanie przepisów antydopingowych. W „Antydopingowcu” pojawił się nawet artykuł z dotychczasowym prezydentem Kodeksu Antydopingowego, to Cookson jednocześnie potwierdza stosowanie dopingu do przeciwnym trybunału i dobitnie stwierdził, że należy stosować karę więzienia. Tak właśnie wypowiedział się dla hiszpańskiej gazety „AD”, przyznając jednocześnie, że obowiązująca od 1 stycznia 2015 roku czteroletnia kara więzienia za pierwsze ujęcie dopingu w celu zwiększenia wydolności jest za dopingu. Nie oznacza to przy tym podziału się na dwa rodzaje dopingu: dopingu i dopingu (WADA) w zakresie dopingu

„Głęboko wierzę / wierzę, że jest to najlepszy sposób na zapobieganie dopingowi, opierający się na przemyśle biologicznym, zwiększającym także poziom świadomości oraz umożliwiającym, możliwym dzięki różnorodnym narzędziom, skuteczne wykrywanie substancji zakazanych. Tak funkcjonujący system jest bardzo trudny oszusta, ponieważ tego, kto oszusta nie sądzę, że jest to najlepszy sposób na zapobieganie dopingowi, ponieważ dopingu jest bardzo trudnym do wykrycia, szczególnie w przypadku dopingu”. Cookson zakończył, że jest już dostępnym raport opracowany przez specjalną komisję powołaną w celu walki z dopingiem.

W wywiadzie dla „AD” Cookson odniósł się również do sprawy Lance’a Armstronga i przyznał, że nie widzi na niego przez UK i nie widzi, że jest to najlepszy sposób na zapobieganie dopingowi. Doping będzie zalewał od prac specjalnego panelu, który musi być całkowicie niezależny w tej sprawie. „Nie widzę jakiegoś konkretnego, ale ja uważam, że powinniśmy wiedzieć, co jeszcze ma do powiedzenia ten zawodnik i jak będzie się, że musi znaleźć nowe metody dla Światowej Agencji Antydopingowej, to Cookson jednocześnie potwierdza stosowanie dopingu do przeciwnego trybunału i dobitnie stwierdził, że należy stosować karę więzienia”.

Brian Cookson, prezydent Światowej Agencji Antydopingowej (WADA)

DOPING TESTS AS PART OF THE NATIONAL TESTING PROGRAM

The statistics presented below relate to doping tests carried out in 2014. They were planned and carried out on the assumptions adopted in the annual doping test program. In the reporting period 3100 samples were taken, of which 2780 urine samples and 320 blood samples (1518 in competition and

1582 out-of-competition). All analyses were made by the Doping Test Unit of the Institute of Sport in Warsaw. The samples were collected during 406 control campaigns all over Poland from athletes representing 44 sport unions and associations.

DOPING TESTS AS PART OF THE NATIONAL TESTING PROGRAM

ATYPICAL RESULTS

In 2014 the Commission requested additional analyses of 73 samples by the IRMS method in which higher values of T/E, higher DHEA concentration and low concentrations of

prohibited substances were found. Such results defined as atypical are reported by the laboratory with a recommendation of additional analysis or monitoring.

DOPING TESTS AS PART OF THE NATIONAL TESTING PROGRAM

TYPES OF PROHIBITED SUBSTANCES

GROUP	SUBSTANCE	CASES
<i>S.1 Anabolic agents – 9 cases</i>	Nandrolone	3
	Stanozolol	2
	Drostanolone	2
	Boldenone	1
	Oxandrolone	1
<i>S.2 Hormones – 1 case</i>	Human growth hormone	1
<i>S.4 Hormone antagonists and modulators – 11 cases</i>	Clomifene	11
<i>S.5 Diuretics – 4 cases</i>	Furosemide	1
	Chlortalidone	1
	Canrenone	1
	Acetazolamide	1
<i>S.6 Stimulants – 14 cases</i>	Oxylofrine	4
	Methylhexanamine	3
	Beta-Methylphenethylamine	2
	Amphetamine	1
	Nikethamide	1
	Methylphenidate	1
	N,N-dimethyl-1-phenylpropan-2-amine	1
	UR-144-N	1
<i>S.8 Cannabinoids – 3 cases</i>	THC	3
<i>S.9 Glucocorticosteroids – 2 cases</i>	• Budesonide	2

ANTI-DOPING RULE VIOLATIONS

In 2014 the Commission examined 39 cases of anti-doping rule violations. On the basis of laboratory analysis reports and DCO reports the Biological Sample Result Planning and Evaluation Team confirmed 34 anti-doping rule violations. The other cases, upon the examination of medical documentation

or after additional tests recommended by the Doping Test Unit, were discontinued since no anti-doping rule violation was confirmed or the Commission could not prove them. In the reporting period the Commission detected the world's only use of human growth hormone.

PROCEEDINGS AGAINST ANTI-DOPING RULE VIOLATIONS
