

Korea Anti-Doping Agency Announces Final Testing Number for 2011

The KADA is an independent, operating as the central anti-doping organization in charge of carrying out test and result management as well as developing education program.

KADA administered a total number of 4,244 doping control tests in 2011, KADA President Joong-Gon Kim announced. Of those tests, 3,015 doping control tests were conducted on Korean Athletes under the Korea Anti-Doping Program. An additional 1,229 user-pays tests were conducted on behalf of national and international sports organizations.

Out-of-competition(OOC) testing, widely considered to be the most effective method of deterrence, comprised 59% (1,778) of KADA's 2011 domestic tests. OOC testing typically occurs at the athlete's training facility, accommodation, or other location and is performed with no advance notice to the athlete. These testing were primarily targeted at the athletes not only included in the KADA registered testing pool but also participated in 2011 Winter and Summer Universiade, as well as high-risk event, bodybuilding.

The 1,183 In-Competition(IC) tests accounted for the 41% of KADA's test in 2011. These testing were primarily targeted at prize winners and conducted during the major Games like National Sport Festival and the National Competition by event.

KADA carried out 100 blood tests, of which 50 cases were Human Growth Hormone(hGH) and the remaining 50 cases were the analysis of parameters for Athlete Biological Passport(ABP). KADA introduced the analysis of parameters for the first time this year and it is expected to expand each year.

KADA also conducted 1,225 tests of user-pays test on behalf of various

national and international sports organizations during this year. Of those, 413 tests were conducted at International Events held in Korea and 100 OOC tests were carried out by KADA as user-pays test on behalf of International Federation. 453 IC tests were also conducted by requests of National Federation. In accordance with Agreement, 259 user-pays tests were carried out on behalf of 6 Professional Sport Organizations.

Twenty-one(21) anti-doping rule violations were reported during this year. These were mostly due to anabolic agents(41%), diuretics(37%), masking agents(15%), peptide hormones(4%), glucocorticosteroids(4%). More than half of them(13 people) were bodybuilders and they were sanctioned two years ineligibility except one athletes who were sanctioned three months. For the presence of diuretics, one kungdo(Korean Archery) player and four players of disabled events (curling, athletics, tennis, yachting) received a reprimand to three months sanction, For the presence of masking agents, a cyclist and weightlifter received two years sanction respectively. Another weightlifter was given five months sanction for glucocorticosteroids.

Throughout 2011, KADA provided fifteen outreach programs in the IAAF World Championship Daegu 2011, National Sport Festival etc. During the outreach programs, KADA provided various anti-doping information through face-to-face counselling and distributing guidebooks. Athletes played WADA's 'play true quiz' and found information on drug use and why it is banned. In addition, KADA carried out 137 anti-doping education programs to players and leaders.

Testing for 2011

The Number of Tests : 4,240
