

Korea Anti-Doping Agency Announces Final Testing Number of 2012

The Korea Anti-Doping Agency (KADA) administered a total number of 4,186 doping control tests (3,994 for urine, 192 for Blood) in 2012, KADA President Han-Kyeom Kim announced. Of those tests, 2,848 doping control tests were conducted on Korean Athletes under the Korea Anti-Doping Program. An additional 1,338 user-pay tests were conducted on behalf of national and international sports organizations.

Out-of-Competition(OOC) testing, widely considered to be the most effective method of deterrence, comprised 60%(1,717) of KADA's 2012 domestic tests. OOC testing typically occurs at the athlete's training facility or other location and is performed with no advance notice to the athlete. These testings were primarily targeted at the athletes not only included in the KADA registered testing pool but also participated in 2012 London Olympic and Paralympic Games, as well as high-risk event, bodybuilding.

The 1,131 In-Competition(IC) tests accounted for the 40% of KADA's test in 2012. These testing were primarily targeted at prize winners and conducted during the major games like National Sport Festival and the National Competition by event.

KADA carried out 192 blood tests, of which 70 cases were Human Growth Hormone(hGH) and the remaining 122 cases were analysis of parameters for Athlete Biological Passport(ABP). KADA introduced the analysis of parameters for ABP in 2011. ABP test is expected to expand each year.

KADA also conducted 1,338 user-pay tests on behalf of various national and international sports organizations during this year. Of those, 279 tests were

conducted at International Events held in Korea and 90 OOC tests were carried out by KADA as user-pay test on behalf of International Federation. 647 OOC tests were also conducted by requests of National Federation. In accordance with agreement, 322 user-pay tests were carried out on behalf of 7 Professional Sport Organizations.

Fifteen(15) anti-doping rule violations were reported during this year. 7 bodybuilders, 1 ice hockey and 1 roller sports athlete received a two-year sanction for the presence of anabolic agents in a sample. 1 bodybuilder, 1 equestrian, 1 weightlifting and 1 football athlete was given a 3month to 1 year sanction for the presence of diuretics and 1 biathlon athlete received 1 year sanction for the presence of glucocorticosteroids, and football athlete received a reprimand for stimulants.

KADA provided fifteen outreach programs at the venue of National Sport Festival and National Winter Sport Festival etc. Through the outreach programs, KADA provided various anti-doping information by face-to-face counselling and distributing guidebooks. Athletes played WADA's 'play true quiz' and found information on drug use and why it is banned. In addition, KADA carried out 150 anti-doping education programs to 13,112 players and leaders.

The KADA is an independent, operating as the central anti-doping organization in charge of carrying out test and result management as well as developing education program.

Testing for 2012
