## Vision

To protect the physical and mental health of Athletes  
To defend the Sport Spirit of Honesty and Fairness  
To preserve Clean Sport

## Mission

To take zero-tolerance towards doping, making sure athletes and people related would “**Dare not, cannot and wish not**” to Dope, by boosting efficient Anti-Doping Program with high quality.

## Objective

To establish a world-first-class Anti-Doping Agency with **independence, justice, professionalism and authority.**

## From the Executive Director General

What we deeply bear in mind is the responsibilities and obligations on the shoulder of CHINADA as a NADO. Our Objective is to establish a first-class Anti-Doping Agency in the world with independence, justice, professionalism and authority, and to set up a long-term mechanism to prevent, find out and deter doping. It is CHINADA's fundamental goal to protect athletes' physical and mental health, and to preserve the sport spirit of honesty and fairness, as well as clean sport.

CHINADA adheres to the principle of "Strict prohibiting, Serious Testing, and Severe Punishing" and take Zero-Tolerance towards doping by constantly increasing our efforts and inputs in Anti-Doping. We complete Rules and Regulations to solid the legal basis for Anti-Doping. CHINADA carries on with its compulsory educational program which is called the Anti-Doping Education Qualification Program, further better improve its Doping Control quality and effectiveness. We reinforced the function of investigation and intelligence, and imposed harsher consequences on Anti-Doping Rules Violations. CHINADA also sets up a Risk-Alert System.

Even though CHINADA has progressed significantly, we are soberly aware of the challenges facing us. It was such a good lesson and warning for us that the Beijing Laboratory was suspended for 4 months by WADA in 2016. It was such a good lesson and warning for us that the Beijing Laboratory was suspended for 4 months by WADA in 2016.

Nowadays the world Anti-Doping System is undergoing profound reforms, so is Sport in China. Within this background, CHINADA shall spot out its position, clarify its objective, work hand-in-hand with all staff to overcome difficulties and challenges, and to make due contribution to World Anti-Doping.

In 2017, CHINADA will build up its Doping Risk Prevention and Control System by working with all National Federations including: Chinese Swimming Association, Chinese Athletics Association, Chinese Weight-lifting Association, Chinese Wrestling Association, and Chinese Judo Association. CHINADA shall take solution-oriented decisions; make tailored Anti-Doping Programs for athletes at different levels in each and every sport, and to boost the set up of a long-term Anti-Doping mechanism.

In 2017, CHINADA will push forward the top-to-bottom Anti-Doping System in China, will support and encourage local sport bureaus and NFs to set up their own Anti-Doping Organizations. The share of responsibilities between CHINADA and other Anti-Doping forces in China will be clarified; a complete chain of Anti-Doping linking the whole country will be established.

In 2017, we will give full play to the role of science and technology in Anti-Doping. CHINADA will launch a Doping Control Project based on big data analysis, and will carry out value-based Anti-Doping Social Scientific research projects. CHINADA will actively support the Beijing Laboratory for scientific research to improve analytical abilities and competence.

From 2017 to the years to come, CHINADA will continue to innovate in all Anti-Doping areas, including Education, Prevention, Warning and disciplining. We will also continue to maintain international cooperation and exchanges, to reinforce our good relation with WADA, IOC, NADOs, IFs among other international organizations, to push forward world Anti-Doping cause.

There is an old Chinese saying that When you hoist the sails to cross the sea, you will ride the winds and cleave the waves. Every member of CHINADA will stay together and overcome all the difficulties by working with willpower and tenacity, to make due contribution to clean sport.

A stylized handwritten signature in black ink, likely belonging to Mr. CHEN Zhiyu.

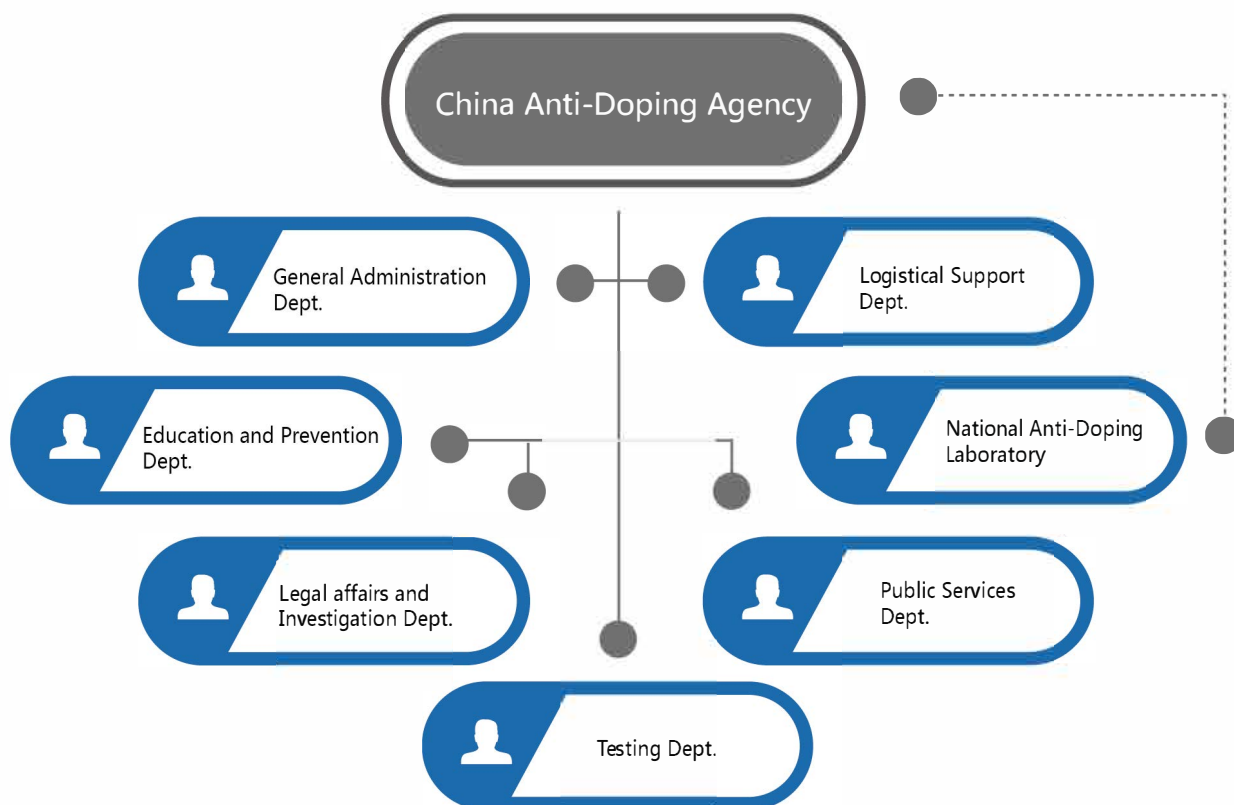

Mr. CHEN Zhiyu  
Executive Director General  
CHINADA

## Working Staff

---

The number of total staff is **67**, Male to Female ratio **36:31**, Average length of employment: **11.6** years

Professional Title	Senior	Deputy Senior	Middle	Primary
Number	12	9	5	5

## Education Lecture

Education Lectures  
were given in **2015**

Education Lectures  
were given in **2016**

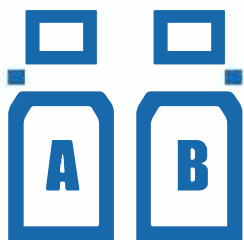

Participants

Anti-Doping Education Lecturer Group was founded in September 2015, consisting of 32 members currently. 11 are from CHINADA, 14 are from Provincial and Municipal Sport Bureau, 3 are from sport association, 2 are from sport university, and 2 are from China Administration of Sports for Persons With Disabilities and Federation of University Sports of China.

## Testing

## General Test Info.

Total tests number **12414**, including:  
**8131** tests paid by the government,  
 taking up **65%**  
**4283** tests paid by other clients,  
 taking up **35%**

### Other clients include:

International Organizations (USADA, ASADA, FISA, IGF, Sportaccord and so on), NFs, Chinese Paralympics Committee, Chinese Federation of University Sports, local sport bureaus, universities and other social associations.

## **Analysis**

## Breakthrough in Analytical Methodologies

### LC-MS/MS Detection Method on Small Peptides

Since peptide hormones were included in the Prohibited List in 1999, the detection of certain substances were always struggled to be solved for decades due to the short excretion window, low in vivo concentration level and molecular similarity with endogenous origins.

In the beginning of 2016, Beijing lab has built a SPE extraction followed by LC-MS/MS detection method to detect 15 GHRFs, GnRH and 8 of relative metabolites. The method has been fully validated and included under ISO accreditation scope by CNAS, which is now applied in routine analysis and participated in WADA EQAS with satisfactory result.

### Analytical Methods with Q-Exactive Plus instruments

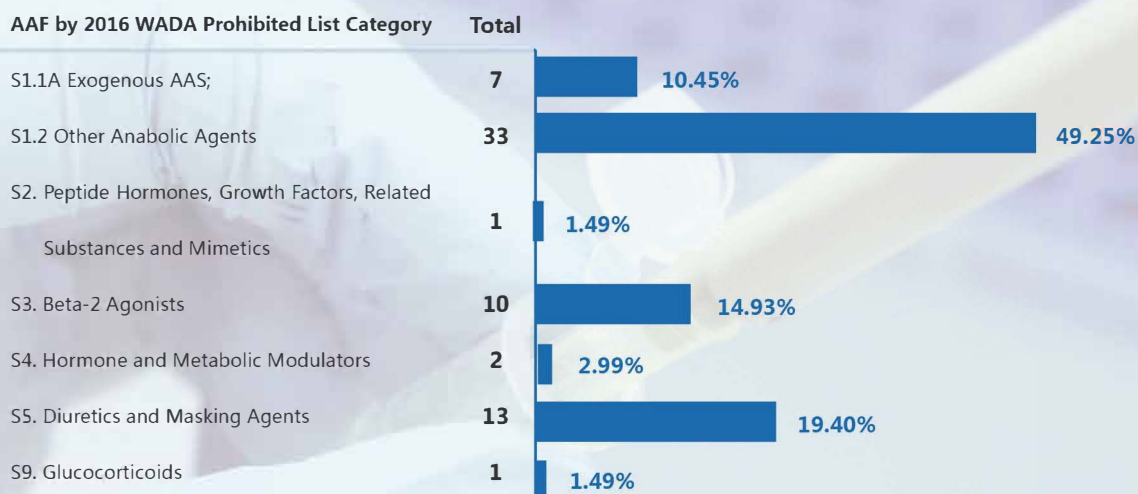

Since June 2016, Beijing lab purchased two sets of Q-Exactive Plus instruments from Thermo Fisher. A new routine analysis procedure was established utilizing Parallel Reaction Monitoring mode to detect dozen of substances with metabolites which were incomprehensive with other LC/MS-MS and GC/MS-MS instruments. This method is fully validated and applied in routine analysis for thousands of samples and all WADA EQAS rounds since then, which detected more than 10 AAFs.

A person is seen from the back, wearing a white short-sleeved shirt. The shirt has the Chinese characters '纯洁体育' (Pure Sports) printed on the back in a large, bold, black font. The person is holding a white document or folder in their hands. They are standing in front of a bookshelf filled with books. The background is slightly blurred, emphasizing the person and the text on their shirt.

纯洁体育

Strategic Partnership with SINA Sports

28 December, 2016, CHINADA and SINA Sports officially signed the strategic cooperation framework agreement. Under this agreement, SINA Sports will build the anti-doping web page in SINA website and provide internet communication platform. Meanwhile, as the strategic partner of CHINADA, SINA Sports will conduct in-depth report and interview concerning the major events of CHINADA.
